HeidelbergCement

2015 Trading Statement

16 February 2016

Dr. Bernd Scheifele, CEO and Dr. Lorenz Näger, CFO

London Crossrail Tunnel

Disclaimer

Unless otherwise indicated, the financial information provided herein has been prepared under International Financial Reporting Standards (IFRS).

This presentation contains forward-looking statements and information. Forward-looking statements and information are statements that are not historical facts, related to future, not past, events. They include statements about our believes and expectations and the assumptions underlying them. These statements and information are based on plans, estimates, projections as they are currently available to the management of HeidelbergCement. Forward-looking statements and information therefore speak only as of the date they are made, and we undertake no obligation to update publicly any of them in light of new information or future events.

By their very nature, forward-looking statements and information are subject to certain risks and uncertainties. A variety of factors, many of which are beyond HeidelbergCement's control, could cause actual results to defer materially from those that may be expressed or implied by such forward-looking statement or information. For HeidelbergCement particular uncertainties arise, among others, from changes in general economic and business conditions in Germany, in Europe, in the United States and elsewhere from which we derive a substantial portion of our revenues and in which we hold a substantial portion of our assets; the possibility that prices will decline as result of continued adverse market conditions to a greater extent than currently anticipated by HeidelbergCement's management; developments in the financial markets, including fluctuations in interest and exchange rates, commodity and equity prices, debt prices (credit spreads) and financial assets generally; continued volatility and a further deterioration of capital markets; a worsening in the conditions of the credit business and, in particular, additional uncertainties arising out of the subprime, financial market and liquidity crises; the outcome of pending investigations and legal proceedings and actions resulting from the findings of these investigations; as well as various other factors. More detailed information about certain of the risk factors affecting HeidelbergCement is contained throughout this presentation and in HeidelbergCement's financial reports, which are available on the HeidelbergCement website, www.heidelbergcement.com. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the relevant forward-looking statement or information as expected, anticipated, intended, planned, believed, sought, estimated or projected.

In the first quarter of 2014 HeidelbergCement applied the new IFRS standards 10 and 11 for the first time. According to the new rules the proportionate consolidation is abolished. Instead, joint ventures are to be accounted for using the equity method. Assets and liabilities as well as income and expenses of joint ventures will no longer be shown proportionately in the relevant balance sheet or income statement items, but will only be shown in a separate line using the equity method: the carrying amount in the balance sheet and the result from joint ventures in the income statement. Among the joint ventures of HeidelbergCement are important operations in Australia, Turkey, China, Hungary, Bosnia and the USA (Texas), which have contributed significant results to the operating income in the past. In order to continue with a comprehensive presentation of the operational performance, HeidelbergCement will include the result from joint ventures in operating income before depreciation starting with the first quarter of 2014.

2014 figures are restated by reclassification of disposed part of Building Products (in accordance with IFRS 5) and reclassification of Cement Australia due to a new interpretation of IFRS 11 based on tentative IFRIC agenda decision in November 2014.

HEIDELBERGCEMENT

Contents

HeidelbergCement continues to grow and deliver

- **Solid improvement in full year operational results:**
  - Revenue up +7%; Operating EBITDA up +14%; Operating income up +16%
  - Operating EBITDA margin improved by +130bps to 19.4%
  - Efficiency programs lead to margin improvement in all business lines
- **Italcementi transaction on track**
  - Synergy potential target further increased to €m 400
  - Refinancing need taken below €bn 2
  - Timing of closing in line with initial expectations
- **Net debt at approx. €bn 5.3, leading to approx. 2.0X leverage**

Group Overview

- Solid volume growth in US and Africa compensates pressure on Asia and Europe
- On LfL basis: operating EBITDA up 8%; operating income up 10%
- LfL Operating EBITDA margin improved by +151bps
- Clear margin improvement in all business lines; ~40% operating leverage

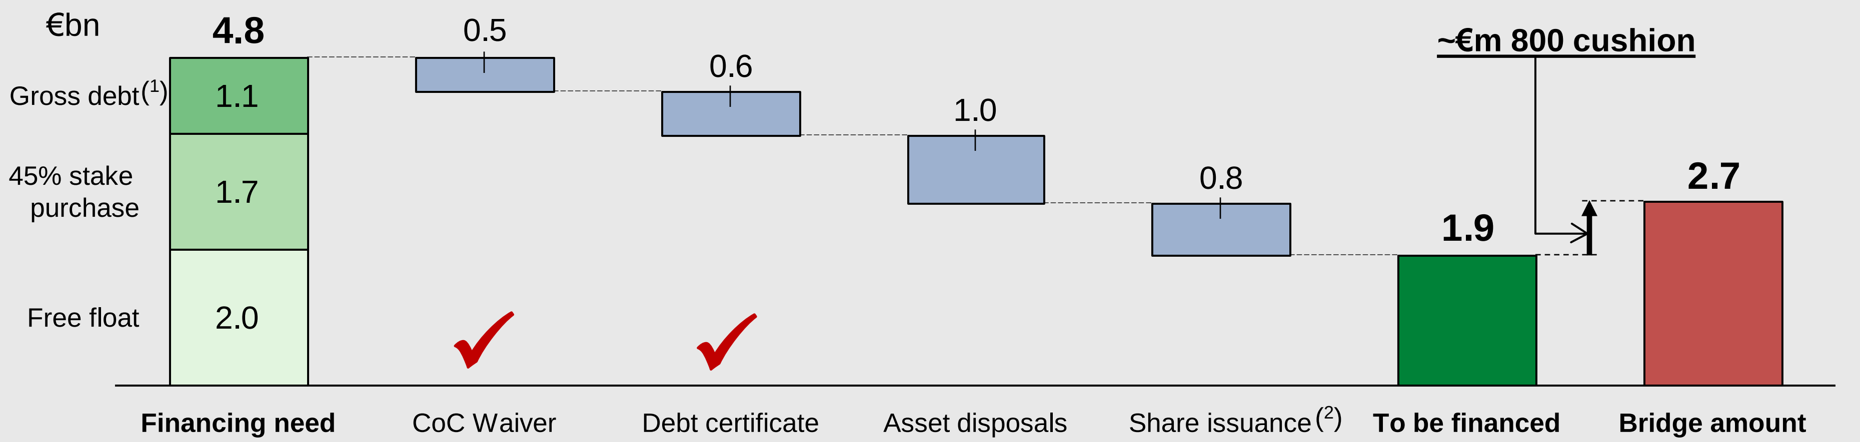
Italcementi transaction update

Refinancing need below €bn 2



Transaction on track, expected closing time is in line with initial plans

- **Discussions with antitrust authorities continue**
  - Clearance received from India, Canada, Morocco and Kazakhstan authorities.
  - Phase 2 discussions going on with FTC in US.
  - Drafting the official filing and discussions continue with EU Commission for Belgium assets.
- **Integration and execution**
  - Integration preparations continue as planned. Key organizational announcements to be made in Q1.
  - Detailed synergy implementation and execution plans in development by project teams.

(1) Gross debt affected by change of control, including fees.
(2) Based on 10.5m shares with price of €72.5.

HEIDELBERGCEMENT

Contents

North America

- **More than 100% operating leverage for the full year (*)**
- **EBITDA margin up significantly in all business lines, driven by good pricing, disciplined cost management and solid volume growth**
- **USA:**
  - Cement: North and West continue to be strong; South is negatively impacted by timing of large projects and inclement weather
  - High single digit cement price growth in all regions
  - Strong aggregates demand and pricing
- **Canada:** Drop in demand in Alberta due to low oil price is to a large extend compensated by strong markets in BC and Washington; solid pricing in all business lines and good cost management lead to full year and Q4 EBITDA margin growth

HEIDELBERGCEMENT

Western and Northern Europe

- **UK:** Increased residential demand and large infrastructure projects in the London area continue to drive the growth, albeit at a slower rate in H2; good price development; result significantly above prior year; EBITDA margin up significantly due to strong operating leverage and good cost management
- **Germany:** Positive pricing compensates slightly lower volumes leading to full year EBITDA margin improvement
- **Benelux:** EBITDA up for the year; gradual market recovery in Belgium; Netherlands expected to improve in 2016
- **Northern Europe**: Increased building materials demand in Sweden, primarily driven by residential construction in Stockholm; lower demand in Norway, mainly due to weaker oil related activity in Western Norway

HEIDELBERGCEMENT

Eastern Europe-Central Asia

- **Poland**: Cement volume decline as a result of fierce competition is partly compensated by lower variable costs
- **Czech Republic:** Full year cement and aggregates volume growth and good cost control lead to higher EBITDA
- **Romania**: Full year EBITDA margin improvement despite increased competition
- **Russia:** Significant decline in sales volumes and result due to slowdown of economy and depreciation of the Ruble
- **Ukraine:** Margin pressure from increased variable costs due to high inflation and depreciation of local currency; stabilization of result
- **Kazakhstan**: Strong volume development as a result of our new Shetpe plant; profit negatively affected by margin pressure from imports and substantial depreciation of local currency

Asia-Pacific

- **Indonesia:** Full year market demand below expectations as a result of delayed infrastructure projects; volume pick up has started in H2; disciplined pricing and strict cost management leads to resilient EBITDA margin
- **India:** Soft cement demand in all market segments and weak pricing lead to EBITDA margin decline
- **China:** Lower variable costs cannot offset substantial price declines and lower market demand
- **Bangladesh:** EBITDA margin improves, helped by lower raw material costs
- **Australia:** Result up vs. prior year; concrete and aggregates volumes increase driven by residential construction growth and pull-through of own aggregates into concrete enabled by integrated supply chain management

Africa-Mediterranean Basin

- **Tanzania:** Significant volume growth supported by capacity increase in Q3'2014; increased competitive pressure
- **Togo:** Significant volume and result increase driven by the start up of our new clinker plant
- **Ghana:** Result negatively affected by increasing competitive pressures and depreciation of local currency, however, full year result still above prior year
- **Israel:** Stable full year result on high level
- **Turkey:** Result improvement supported by exports and better pricing
- **Spain:** Recovery in market is clearly visible; outlook for 2016 is positive

Group Services

- Despite a slowdown in Q3, full year international trading volumes are 1% above 2014
- Low cost sourcing of raw materials and low freight rates contributed significantly to the profitability of HC grinding units and bulk import terminals in 2015
- Recovery in trade volumes and profitability in Q4 partially compensated deterioration of commodity markets in Q3
- Full Year EBITDA is negatively affected by fierce competition and rising margin pressure in addition to unexpected costs resulting from the instability of shipments to North Africa (Algeria and Libya)

HEIDELBERGCEMENT

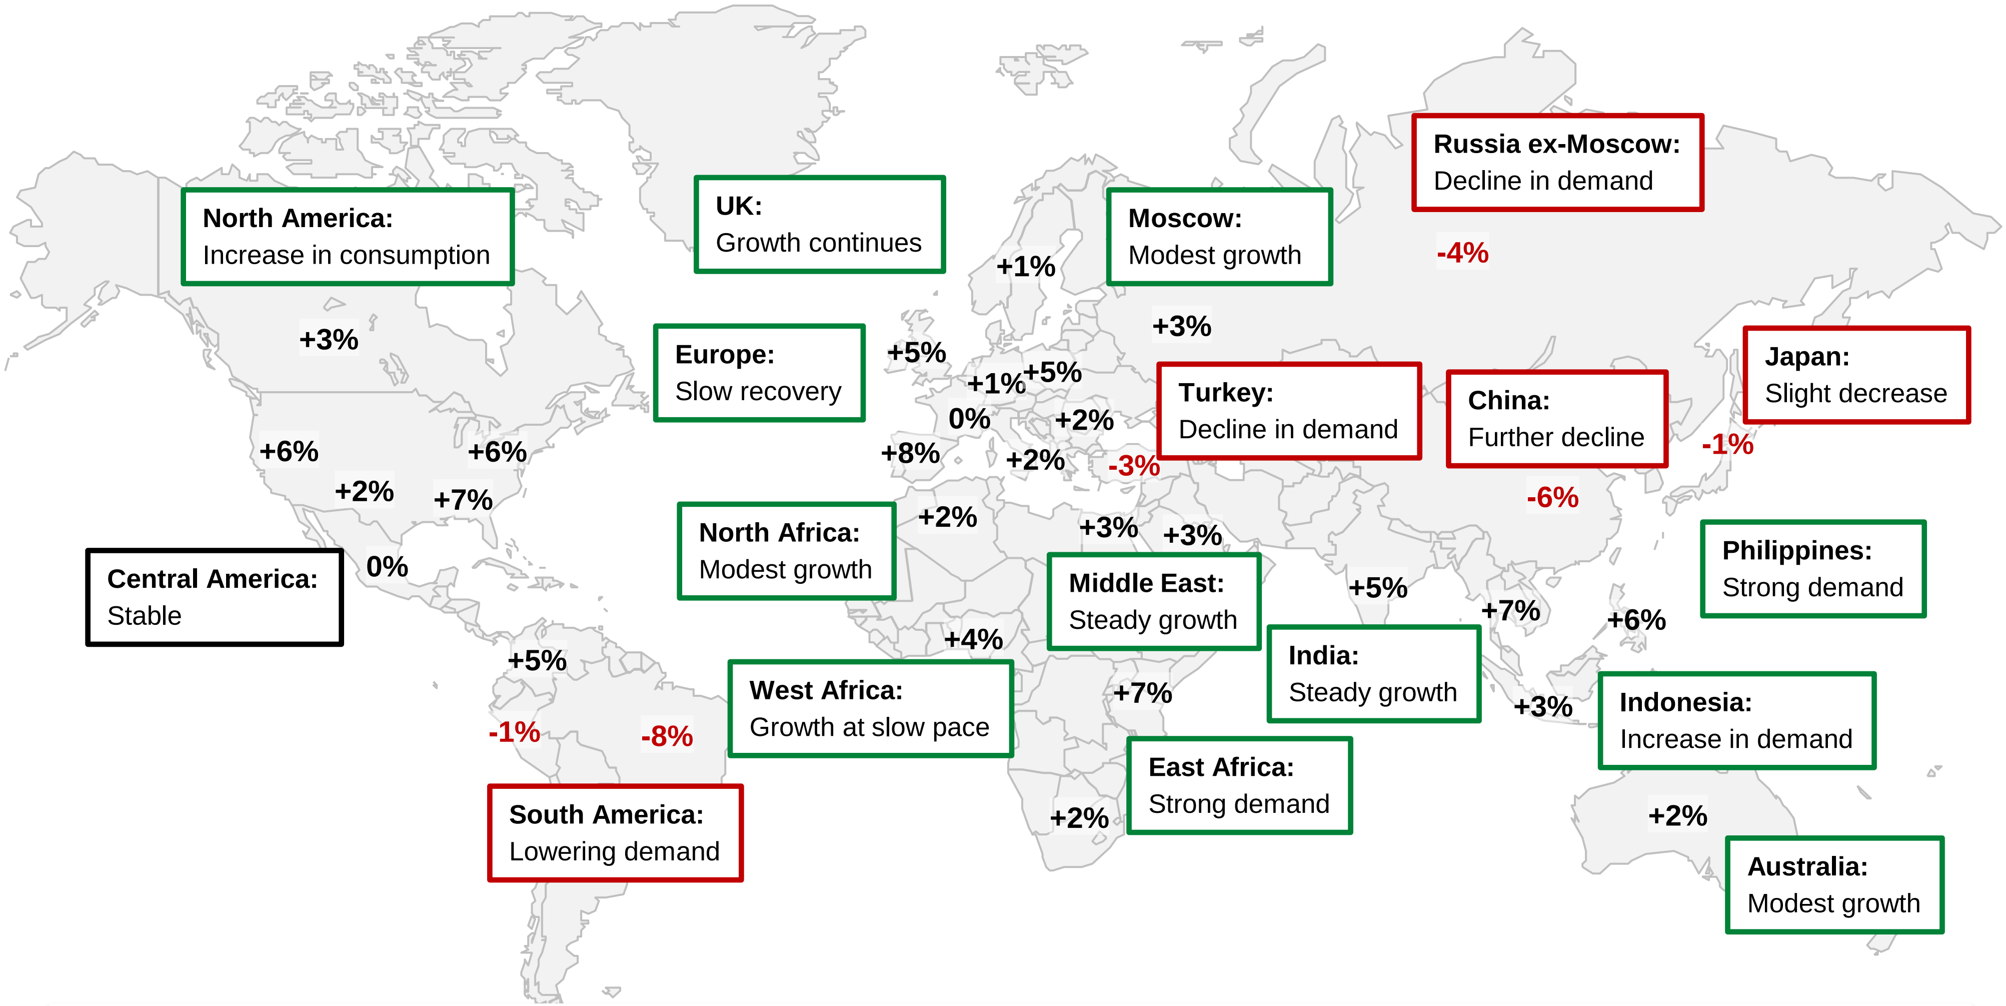
Global cement demand outlook 2016

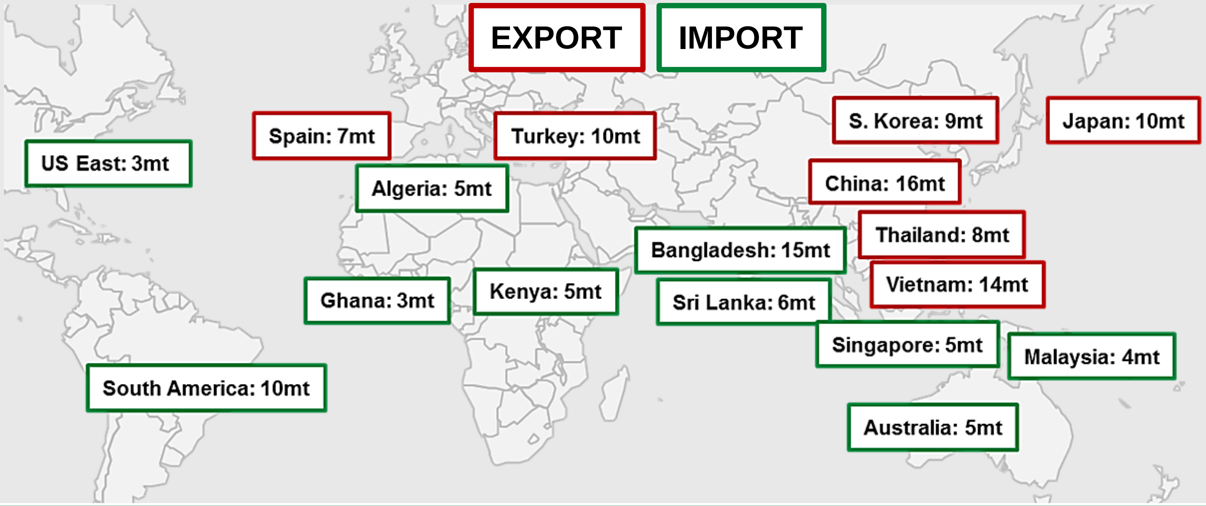


Overall steady demand at a lower growth rate; except China, South Americas, Russia and Turkey

HEIDELBERGCEMENT

Supply/Demand balance and China exports

Major Export & Import Countries / 2016 estimates



- Exportable volume is mainly in Asia and Mediterranean.
- Most of the exported volumes stay within the region.
- Increase in demand in US, in Africa and low freight rates will be the drivers for the imports.

Impact of Chinese excess capacity and possible imports are limited

- Available amount for imports will be limited as large amount of excess capacity is located inlands.
- Chinese import prices may be able to compete with Mediterranean producers on spot but not on long term basis.
- International major players have very well established trading operations with their trade flows.
- Import terminals are usually owned by domestic producers in US and in Europe. Ports in emerging countries are often congested.

CEMENT IS NOT STEEL

- Huge difference in price and profitability. Value to weight ratio much higher in steel.
- Cement markets away from the terminals are protected .
- Unlike cement, steel import terminals and global trade flows are handled by mix of independent wholesalers & producers.
- Active workforce in steel is twice as many people as the cement industry in China.

HEIDELBERGCEMENT

Overview of key markets

North America

- Solid underlying business trend
- Stabilized market environment in Texas and Canada
- Strong aggregates demand
- Further price improvements in all business lines
- US Highway bill will have a clear positive impact, especially on aggregates business. Long term projects replacing shorter term maintenance works will bring further stability in demand growth.

Indonesia

- Overall better market environment expected after interest rate reduction and stable political situation
- Over-supply situation and tight competition with new players may put pressure on pricing
- Infrastructure projects and their multiplier effect will be the key driver for demand growth
- 4.4 mt new capacity in Citeureup ready to operate by Q2 will further improve cost structure

West & North Europe

- UK continues to be strong
- Volume improvement in Germany
- Stable business environment in Nordics
- Demand pick-up in Netherlands, Belgium coming back from low levels

Eastern Europe

- Clear demand increase in all key markets
- Better pricing environment expected in Poland and Romania
- Positive market trends from low levels in Russia and Ukraine
- Growth continues in Czech Rep. & Hungary

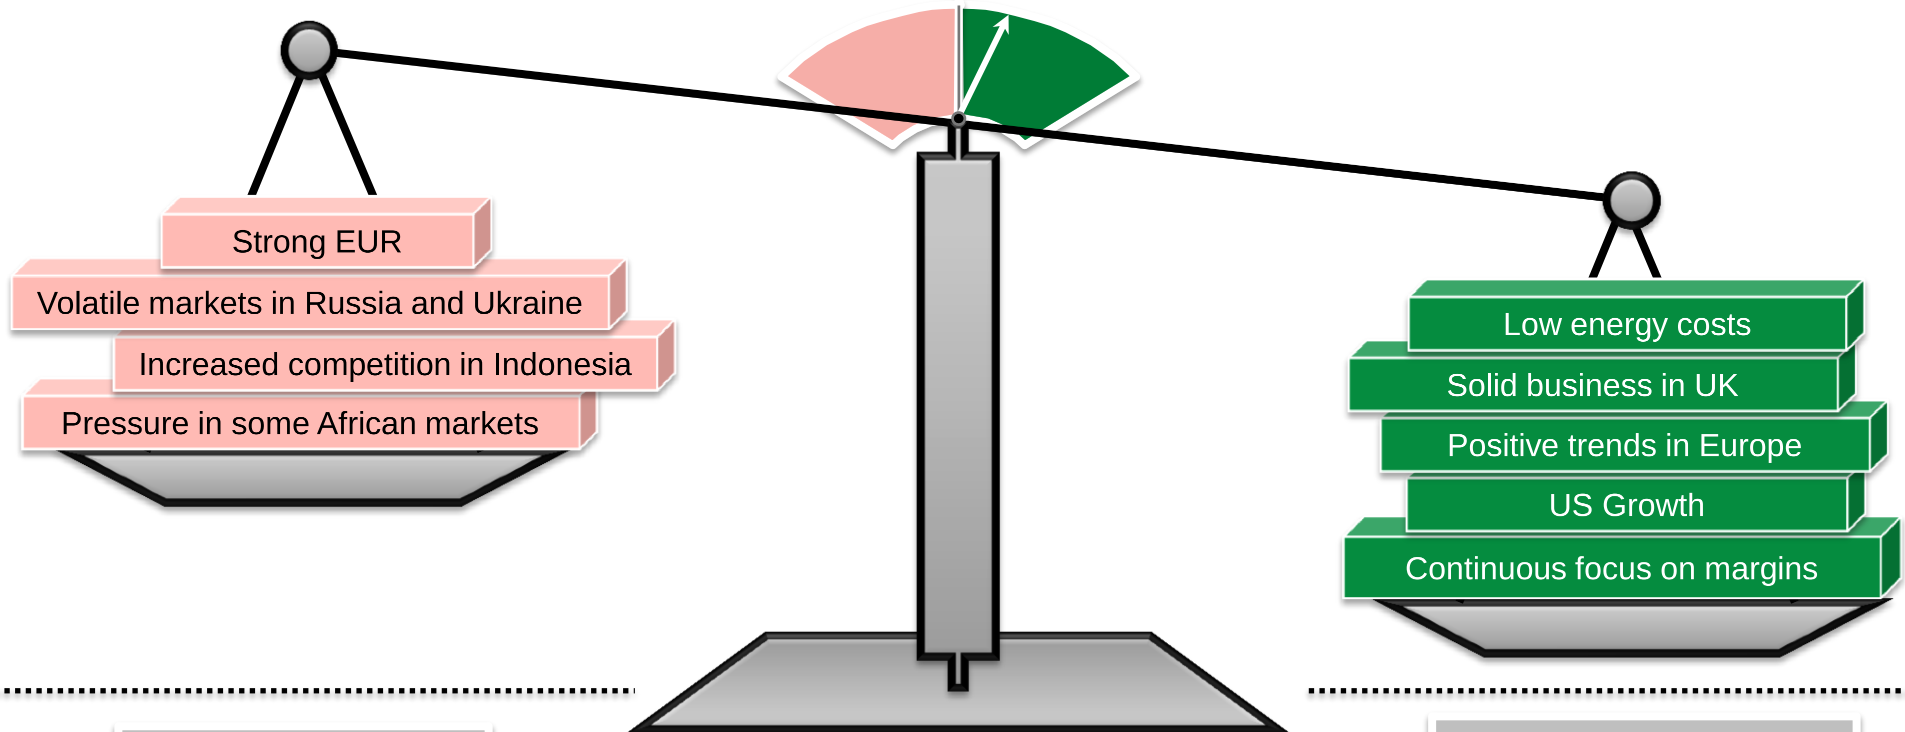
Africa

- Challenging market environment in Ghana
- Togo continues to be strong
- Volatile market demand in Tanzania
- Stable business development in other countries

Continued growth in developed markets will offset the pressure in emerging world

HEIDELBERGCEMENT

Major drivers for business environment in 2016



DOWNSIDE RISKS

- Slowdown in US economy
- Uncertainties in Middle-East
- Depressed economy in Europe

UPSIDE POTENTIALS

- EUR getting weaker
- Further decline in energy costs
- Stronger Indonesia infrastructure

Overall challenging but still positive business environment is expected in 2016
