

Formpave[®]

Royal Forest[™]

Edging • Standard kerb & step system • Bull nose kerb

Two kerb systems are available; both are designed to work with the Royal Forest™ range of Paving blocks and Small element paving.

Standard kerb

- Consists of 17 blocks
- Facilitate edge restraint
- Cornering
- Cross-over and transition
- Used in both high and low profile
- Inverted to form steps
- Available in 8 colours - 4 colours are special order only

Bullnose kerb

- 6 blocks
- Provides softer profile edge restraint
- Appropriate fittings to work with standard blocks and paving

EcoGranite™ Kerb

- Manufactured from recycled aggregates
- Textured surface finish
- Deeside Center stone
- Droppers and Quadrant available
- Manufactured in Cornish and Deeside colours
- Bush hammered finish

Forest edging

- Substantial all purpose edge restraint
- Can either be laid flush with block paving or as an upstand
- Quicker and easier to lay than conventional kerb units
- Olden or bush hammered surface finish to special order
- Laid flush with paved areas allows surface water to drain easily into soft landscaping

Transition kerbs

Transition kerbs are for use with the standard kerb and step system. The colours and finishes match the standard kerb system.

Use: Roads and footpaths on commercial, industrial and domestic sites.

Spacing nibs: Not incorporated on the blocks.

Finishes and colours: Standard finish in four colours. Special colours and a shot blasted finish are available to order.
